

Key

Green = Model

Blue = Controller

Purple = JavaFX Classes

Captions on arrows
are not necessarily for
associations, but to make direct
arrows since this got seperated
into multiple pages

FileHandler

+ findPath(fileName:String): file

- find(fileName: String, currentDirectory: File): File

Database

- storeDir: File

- storeFile: String

- adminUsername: String

- adminPassword: String

- admin: User

- stock: User

- initStartingDate(): void

+ saveCurrentDatabase(): DBStatus

+ loadDatabase(): DBStatus

- writeFile(db: Database): void

- readFile(): Database

+ deleteUser(user: User): boolean

+ addUser(user: User): boolean

+ authorize(username: String, password: String): boolean

- getUser (String username): User

+ exists(user: User): boolean

+ isAdmin(user: User): boolean

+ getAlbum(user: User, Album album): Album

+ addAlbum(User user, Album album): DBStatus

+ deleteAlbum(user: User, album: Album): DBStatus

+ addPhoto(user: User, album: Album, photo:Photo): DBStatus

+ searchByTag (user:User, tag:Tag): List<Photo>

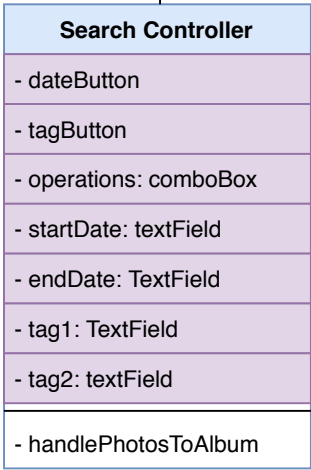

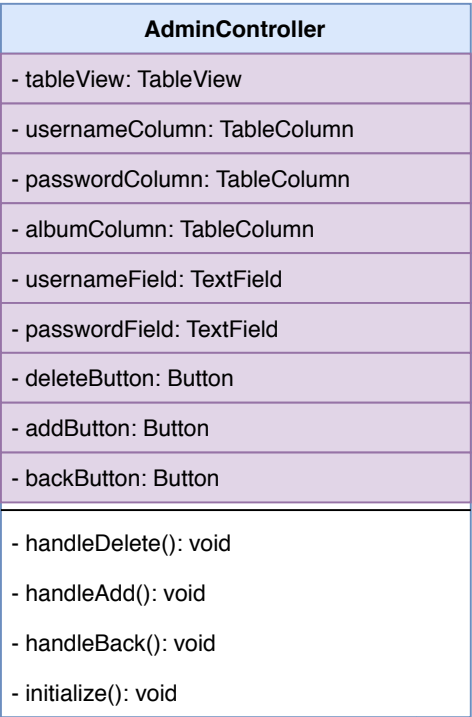

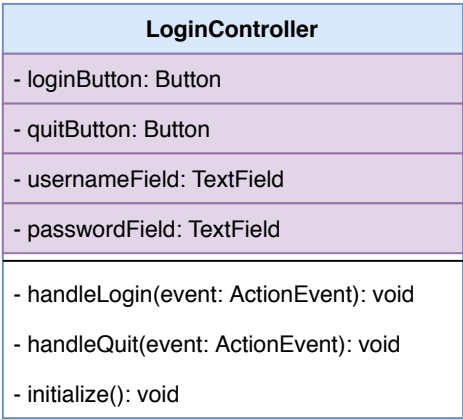

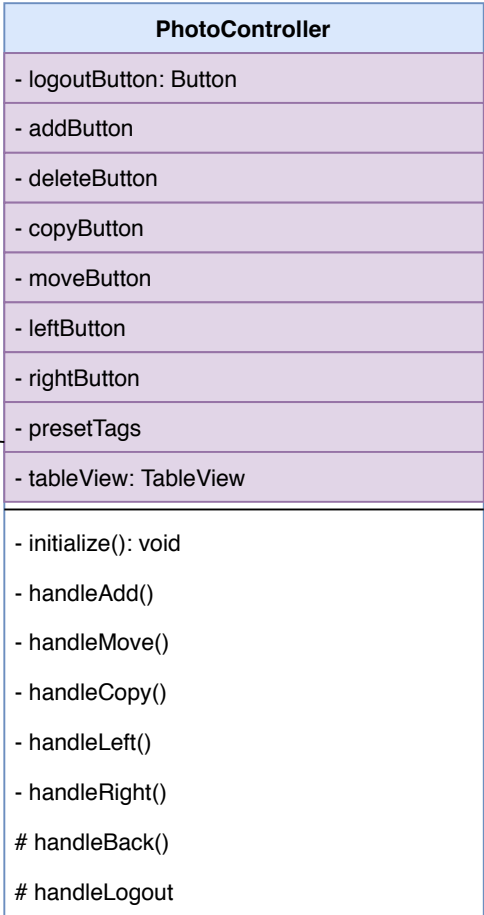

+ searchByTagConjunctive(user: User, tag1: Tag, tag2:Tag): List<Photo>

+ searchByTagDisjunctive(user: User, tag1: Tag, tag2: Tag): List<Photo>

+ searchByDate(user:User, start: Calendar, finish: Calendar): List<Photo>

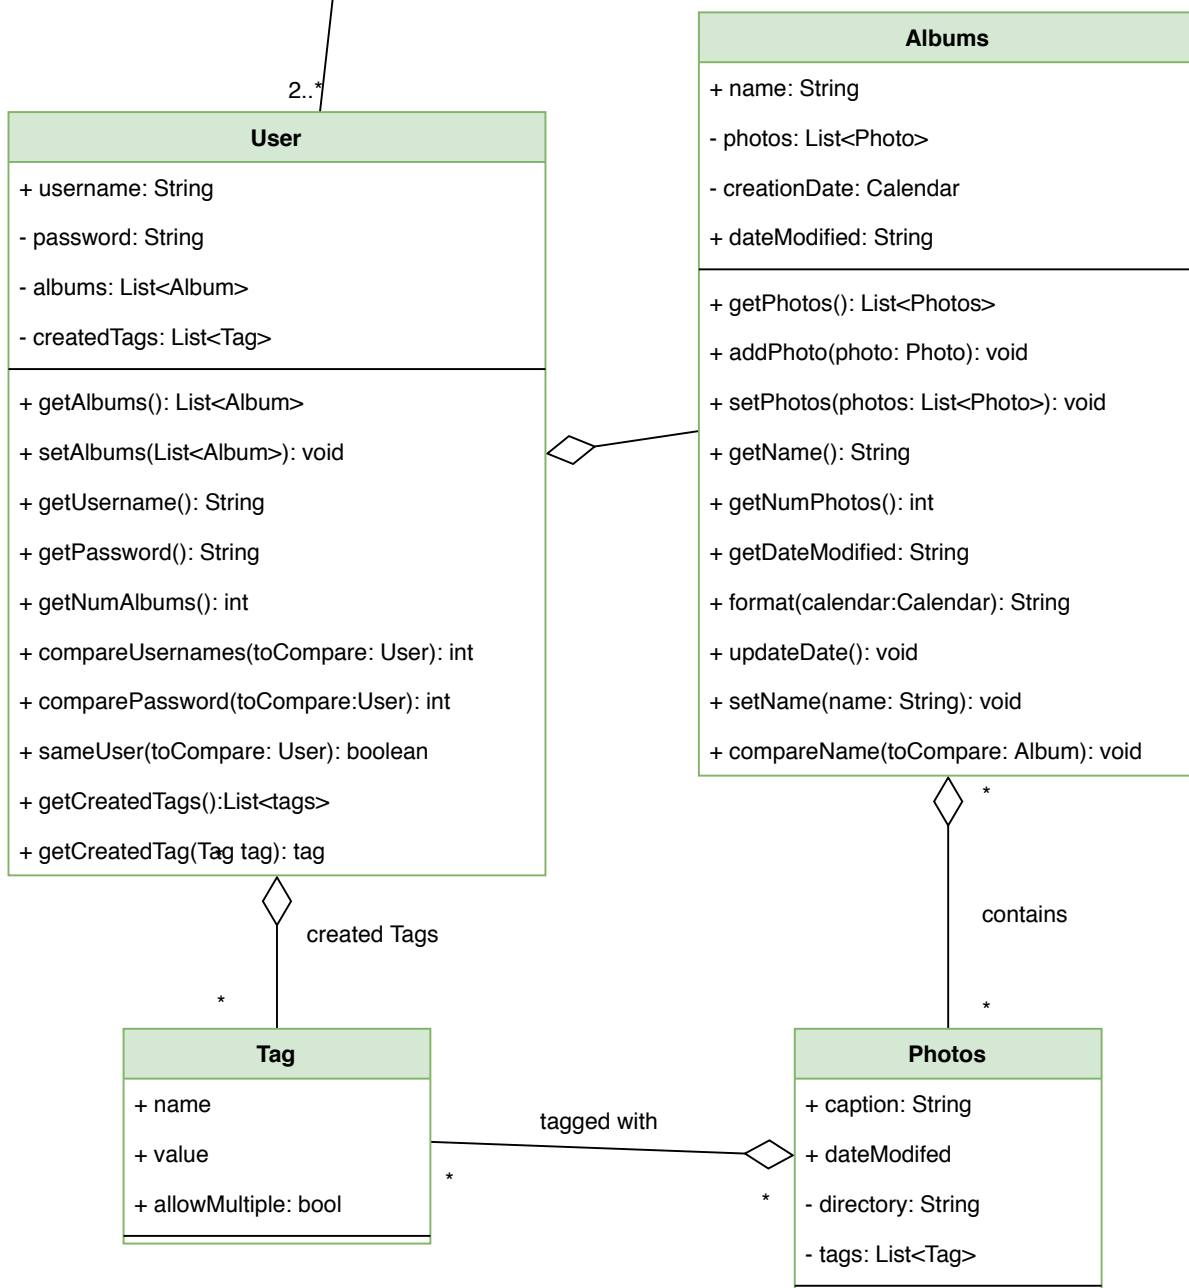

this arrow should not be here, but is a
bug from the program I'm using

all goes to Controller

frm database

arrows from Admin, Login, and Photo Controller

AlbumController

- welcomeNote: Label

- addButton: Button

- deleteButton: Button

- searchButton: Button

- backButton: Button

- tableView: TableView

- nameColumn: TableView

- numColumn: TableView

- dateColumn: TableView

- optionsColumn: TableView

- initialize(): void

- handleCellFactory(): void

- handleSearch(): void

- handleAdd(): void

- handleEdit(): void

- handleView(): void

- handleDelete(): void

- handleBack(): void
